Blog Theme Pack

Information Sheet

About this Theme Pack

The Blog Theme Pack includes 3 professionally-designed themes that have been rigorously tested all the major web-browsers:

Blog Blocks is our first theme with just one column. Keep your content in order with this uniquely fun, one column design - the sidebar content is displayed in it's own area below the main content.

Blog Modern is a classic two column theme. Its pastel colours and subtle details are bound to wow your visitors. It's clean, cool and very versatile.

Blog Funky is our first ever theme with three columns. The two outer columns are fixed in size, while the center column is fluid so it resizes with the browser window giving you maximum space for your content.

N.B. This theme pack requires RapidWeaver 3.5 or greater

Installing the Theme Pack

Installing the three themes is easy:

1. After purchase, be sure to click the 'Download Now' button in your receipt to download the theme disk image
2. Double-click the downloaded file, to open it.
3. In the Disk Image, simply double-click all three .rwtheme files.
4. RapidWeaver will launch and install the themes.
5. Re-launch RapidWeaver to use the themes.

Support

If you require support for this theme pack, simply visit <http://www.realmacsoftware.com/support> for further information.
